## Nationwide Tailored Solutions. White-Glove Implementation & Support.

Telesystem empowers businesses across the country with a range of innovative solutions for communications, collaboration, networking, security and infrastructure. Made possible by the development and delivery of advanced technologies, Telesystem designs unique solutions to address the business-specific needs of each customer and solve their most complex IT and network challenges.

Telesystem's national service portfolio includes advanced offerings such as SD-WAN, Managed Security, Hosted VoIP, Secure Internet, Managed WiFi, SIP Trunks, UCaaS, CCaaS, and Dedicated Internet, across our highly advanced fiber carrier-grade Ethernet core network.

Telesystem boasts 39 national Points of Presence (POPs), 3 privately-owned, compliant data centers, and 97 NNI Agreements which allow for blanket Ethernet coverage from coast to coast. Guided by our strategic partnerships and customer-centric mission, Telesystem currently delivers solutions to businesses in 45 states, DC and 4 foreign countries. Our customers include hospitals, universities, local public and private school districts, banks, and regional government offices, to name a few.
