

EFFORTLESSDESKTOP™

Built by engineers with over 15 years of experience delivering VDI and DaaS (Desktop-as-a-Service) systems, we are proud to offer our clients the EffortlessDesktop™ solution. Now you can move your desktop into the cloud and work from any device at any time, efficiently and securely.

EASE OF USE

Your desktop looks and operates just like what you have now – but from the cloud! Access your desktop anytime from anywhere, effortlessly.

SECURE

Effortless has built our VDI and DaaS solutions on the most advanced technologies available today and in the most secure data centers on the planet.

AFFORDABLE

By using your desktop in the cloud, all of the cost savings are passed down to you. Expensive networks and hardware are things of the past.

TECHSPECS

- ClearSky Migration
- Windows OS Included
- Advanced Cybersecurity
- Native Business Continuity
- GPU Capability
- Local Printer & USB Functionality
- Standalone & Domain Integration
- Base Desktop: 2 Core, 6GB Memory, 70GB Disk Space
- 3rd Party & Legacy App Support
- HIPAA, HITECH, SOCII Type2, PCI, and more
- Desktop Recording, Monitoring & Alerting Options Available

YOUR DESKTOP IN THE CLOUD - SECURELY

The EffortlessDesktop™ is engineered and built at Switch, the most advanced and secure Tier 4 Data Centers on the globe. We have not only chosen leading enterprise technologies, but we focused on meeting and even exceeding the strictest compliance and cybersecurity measures for technology, process, and personnel.

- Public and private cloud desktops
- Customizable and scalable
- 24/7/365 unlimited end-user support

YOU'RE ALWAYS CONNECTED

Your business can now be powered by a cloud desktop that is secure and lightning fast from any device with an Internet connection.

- Windows Devices
- Apple Devices
- Android Devices
- Kindle
- And More

ELIMINATE SOFTWARE INCOMPATIBILITY

With all of your employees' devices updated to the latest applications and operating systems, you can rest assured that there aren't any compatibility issues across devices.

Your company in the cloud. **Effortlessly.**

IS SETTING UP AND USING EFFORTLESSDESKTOP™ EXPENSIVE?

In most cases, the cost of moving to EffortlessDesktop™ will reduce your overall IT expenditure by 10 to 40 percent.

As with all cloud technologies, the ability to move from CAPEX to OPEX has inherent advantages: a fixed and predictable monthly cost. However, for those who prefer a CAPEX model, EffortlessDesktop™ can be deployed in one's custom, private cloud. You can extend the life of legacy, client-side hardware, making the need to upgrade your network to advanced solutions a thing of the past.

WHAT ABOUT SUPPORT? WHEN I HAVE A PROBLEM, WHAT DO I DO?

Support for basic, end-user application problems to advanced 3rd party applications is included in the desktop cost.

Your EffortlessDesktop™ is supported by the same engineers who developed it. We work with and manage relationships with application providers, so you don't have to. You only need to open a ticket via email, or a call into our NOC for support.

WHAT'S THE PERFORMANCE OF THE DESKTOP? WILL IT BE SLOW SINCE IT'S IN THE CLOUD?

The end-user experience with the cloud is equal to or better than it is with a local PC.

With over 10 years of experience, Effortless has learned what is needed to ensure that the desktop performs efficiently so that businesses like yours can handle video, streaming, and other advanced applications, such as AutoCAD.

A lot of factors can influence the performance of the desktop. We have advanced monitoring and alerting on devices outside of our data center, so we can identify problems and address them accordingly.

WHAT ABOUT SECURITY? HOW CAN THE EFFORTLESS DESKTOP BE SECURE IF IT'S ALWAYS ONLINE?

We designed our infrastructure from the ground up with security and compliance in mind. Enterprise-class technology is used throughout the EffortlessDesktop™ solution.

- Advanced Firewalls
- Powerful Servers
- Powerful Storage Systems
- State-of-the-Art Cybersecurity Systems

Also, we follow strict policies and procedures to ensure the human element of the solution meets compliance standards.
